

RaceDay API Endpoint Plan Part 1

This document is the planned REST API for RaceDay. It is intended to be completed and reviewed before Part 2 API implementation begins.

Roles

- **Public** — no login required.
- **Participant** — authenticated participant.
- **Organiser** — authenticated organiser.
- **Participant/Organiser** — authenticated user in either role.

Endpoint Table

HTT P Met hod	Route	Description	Role Required	Request Body	Expect ed Respo nse
POST	/api/auth/register	Register a new participant account	Public	firstName, lastName, email, password	201 Created + user information
POST	/api/auth/login	Authenticate a user	Public	email, password	200 OK + JWT/token
GET	/api/users/me	View the logged-in user's profile	Participant/Organiser	None	200 OK + profile
PUT	/api/users/me	Update the logged-in user's profile	Participant/Organiser	Profile fields	200 OK + update

					d profile
GET	/api/events	Browse available/up coming events	Public	None	200 OK + event list
GET	/api/events/{id}	View one event and its details	Public	None	200 OK + event
POST	/api/events	Create an event	Organiser	eventName, eventDate, location, description	201 Created
PUT	/api/events/{id}	Edit an event	Organiser	Event fields	200 OK
DELETE	/api/events/{id}	Delete an event	Organiser	None	204 No Content
GET	/api/categories	View all categories	Public	None	200 OK + category list
GET	/api/categories/{id}	View one category	Public	None	200 OK + category
POST	/api/categories	Create an event category	Organiser	categoryName, distance, description	201 Created

PUT	/api/categories/{id}	Edit a category	Organiser	Category fields	200 OK
DELETE	/api/categories/{id}	Delete a category	Organiser	None	204 No Content
GET	/api/events/{eventId}/categories	View categories available for an event	Public	None	200 OK + category list
POST	/api/events/{eventId}/categories	Add a category to an event	Organiser	categoryId, entryFee, maxParticipants	201 Created
DELETE	/api/events/{eventId}/categories/{categoryId}	Remove a category from an event	Organiser	None	204 No Content
POST	/api/enrolments	Enter an event/category	Participant	eventCategoryId	201 Created + enrolment
GET	/api/enrolments/my	View the logged-in participant's enrolments	Participant	None	200 OK + enrolments
GET	/api/enrolments/{id}	View one enrolment	Participant/Organiser	None	200 OK + enrolment

DELETE	/api/enrolments/{id}	Cancel an enrolment	Participant	None	204 No Content
GET	/api/events/{eventId}/enrolments	View all enrolments for an event	Organiser	None	200 OK + enrolments
POST	/api/results	Capture a participant result	Organiser	enrolmentId, finishTime, overallPosition, resultStatus	201 Created
PUT	/api/results/{id}	Edit a result	Organiser	Result fields	200 OK
GET	/api/results/my	View the logged-in participant's results	Participant	None	200 OK + results
GET	/api/events/{eventId}/results	View results for an event	Organiser	None	200 OK + results
GET	/api/events/{eventId}/route	View route information for an event	Public	None	200 OK + route
GET	/api/events/{eventId}/weather	View current/planned weather information for an event	Public	None	200 OK + weather

Planned HTTP Status Codes

- 200 OK — successful GET/PUT request.
- 201 Created — successful POST that creates a resource.
- 204 No Content — successful DELETE.
- 400 Bad Request — invalid request data.
- 401 Unauthorized — authentication is required or credentials/token are invalid.
- 403 Forbidden — authenticated user does not have the required role/permission.
- 404 Not Found — requested resource does not exist.
- 409 Conflict — duplicate/conflicting data, such as an existing enrolment.
- 500 Internal Server Error — unexpected server error.

Role Rules

Public

Can:

- Register
- Login
- Browse events
- View event details
- View categories
- View event categories
- View route information
- View weather information

Participant

Can:

- Manage own profile
- Enter events
- View own enrolments
- Cancel own enrolments

- View own results

Organiser

Can:

- Manage own events
- Manage categories/event categories
- View event enrolments
- Capture and edit results

Consistency Requirement

The Part 2 API should closely follow this plan. If an endpoint, route, request body, response or role changes during implementation, the project README should explain the reason for the deviation.
